So far from home, lost in the maze of the storm
Which way to go, keep your vision in my mind to keep me warm

Stare down the road, I see your face on the signs that go by
Hit by the rain, need to see a rainbow of your love that never dies

Chorus: It's cold in the dark, help me make it, help me make it,
to the light...

Unafraid here alone, strengthened by the love in your eyes
Captured by your face, set free by the sound of your sighs

Out of the dark came your light, warmed by the sun from your smile
Fell awake in your sight, touched in time in the night

(Repeat Chorus)

Help me make it, help me make it till the light...
Help me make it, help me make it till the light...
